

STATUS OF KOOP KAPATID

The Koop Kapatid program launched last July of this year has brought positive effects to the cooperatives involved especially that of the micro cooperatives. The first activity they have undertaken was that the Small Brother cooperatives were toured to the office of the Big Brother cooperatives. They were shown of the services rendered and the products offered by the Big Brother.

Series of meetings between the involved cooperatives have been conducted where they were able to identify the needed help and intervention to be made by the Big Brother. Among the identified help are identification of strategies to efficiently collect past due accounts, proper recording of transactions and crafting of coop policies.

They have no concrete activities conducted yet because of the conflict of schedules. However, it will be included in their schedule of activities in the next year.

The Small Brother cooperative don't feel alone this time because of the presence of their Big Brother coop who will mentor them in the management of their cooperatives
